HICKS NURSERY  
WESTBURY, L.I., N.Y.

**T**HIS list is arranged for the use of landscape architects, landscape gardeners, nurserymen, florists, gardeners, park superintendents and others who wish an accurate list of varieties, with sizes and quantity now on hand at the Hicks Nurseries, Westbury, L. I.

"Home Landscapes" tells you how to get the most beauty and fruit from your country place. Did you receive a copy?

### COME AFTER BUSINESS HOURS

Order ahead and your trees will be ready on the office steps.

## BUSINESS TERMS

**PRICES.**—The prices in this list are for trees and plants dug and loaded at our nurseries. We charge for delivery, or packing in boxes, bales or crates for shipment. This saves you money, and is the most equable, because our trees are bigger and heavier than usual nursery stock. We can pack or deliver three large trees, twenty years old, for about the same cost as one. Cartage to the railroad is free.

On request we shall be pleased to estimate the cost of delivery and planting.

Five, 50 and 500 plants sold at 10, 100 and 1000 rates, respectively.

**TERMS OF PAYMENT**—Net cash.

**GUARANTEE—NO RISK TO YOU.**—We guarantee every plant from our nursery, and give new ones for those that do not grow satisfactorily. The cost of planting and transportation of replaced trees is borne by the purchaser.

**PLANTING AND CARE.**—This guarantee holds even if you men plant. It is better that they prepare the ground (send for sizes of holes), plant, mulch, or cultivate and water. Summer watering is the most important. You can keep the plants a week or two by firmly covering the roots with moist earth immediately after delivery.

## SUMMER PLANTING

Nearly all kinds of trees can be taken up with balls of earth by the canvases and platforms which we invented. You do not have to wait a year. If you want a shade tree 28 ft high, 18 ft. broad, you can have it any time during the Summer. It is guaranteed to grow satisfactorily, or replaced with another tree. The risk is ours, the fun is yours.

## FRONT COVER ILLUSTRATION

Would you like to reproduce this on your grounds? It consists of 1 White Birch 10 ft, 1 Red Flowering Dogwood 6 ft., 1 Cedar 8 ft., 1 Cedar 6 ft., 10 Rhododendron, 15 in., 5 Ferns. Packed for shipment \$29.00, or you can send for, or have us deliver at cost.

# DECIDUOUS TREES

## Shade Trees · Flowering Trees · Lawn Trees

ACER. See Maple.

ÆSCULUS. See Horse-Chestnut.

APPLE, Flowering. *Pyrus*. *Malus*.

You can have all the pleasures of the Apple and Cherry blossoms intensified by collections of dwarf flowering fruits. To this is added some of the pleasures of the Rose garden for the double varieties of Peach, Cherry and Plum have taken on some of the charm and fragrance of the Roses. They all belong to the Rose family. You can make up a collection from this list, or come when the plants are in bloom in early May, or select them in bud and take them home with you. Better try the three ways and then come next year and see what new varieties are available.

Bectels. Double pink. *Pyrus Ioensis* var.

*Bechtelii*.

	Quantity	Each	Per 10	Per 100
3 ft. high.....	50	\$1.00	\$7.50	

Floribunda. Single pink.

2-4 ft. high.....	400	.50	4.00	\$30.00
4-7 ft. high.....	100	1.25	10.00	

BEECH, American. *Fagus ferruginea*.

One landscape architect said, "I did not know that such fine beeches were available." Another said when he saw them "Some day I am going to make a Beech grove."

These are grown and handled in a new way for Beeches, the same as we handle big Pines and Firs. They are transplanted when 6 or 8 ft. high with a large ball of earth and put 10 ft. apart. When you buy them 10 or 16 ft. high they are dug with big balls of earth held with canvas and platform. This ball of earth contains numerous small, feeding roots as a result of previous transplanting.

Low-branched specimens are particularly valuable for lawn boundaries, for they are branched to the ground, and holding their russet brown leaves all Winter make a screen nearly equal to the evergreens. Some have been trained up with straight trunks and may be planted for the beauty of their silvery gray bark.

14-16 ft. high, 5 ft. spr.....	12	30.00	

Here is a case where a flat, monotonous piece of ground has been converted into a landscape that nowhere lacks interest. Trees, shrubs, and evergreens have created a series of inclosures like the one illustrated. From the house you are led through an evergreen garden, bristling with interest Winter and Summer. Your walk now disappears into a quiet, cool, shady grove where you would be glad to linger but for that mysterious beyond. Proceeding, you suddenly emerge into this commodious outdoor room, perfectly secluded on all sides and still immediately adjacent to the other departments. Here there is recreation for mind and body. May we help you inject interest into an unenjoyable landscape?

**BETULA.** See Birch.

**BIRCH, American White.** *Betula alba* var. *populifolia*. (See cover illustration).

	Quantity	Each	Per 10	Per 100
4 ft. high.....	150	\$0.30	\$2.50	\$20.00

8 ft. high.....	20	1.50	12.50	

**CERCIS.** See Judas.

**CHERRY, Japanese Double-Flowering Pink.** *Prunus serrulata*.

Great bouquets of flowers will be yours if you plant these because they are full of buds.

We will have some of them in boxes to sell in bloom. There are several shades of color. Deep pink is the most showy.

4 ft. high, 3 yr. grafts.....	100	1.50	12.50	100.00
6-8 ft. high, 3 yr. grafts.....	300	2.50	20.00	

**CHERRY, Wild.** *Prunus serotina*.

Just the tree for planting at the seashore for its thick, leathery leaves withstand the salt spray. They are equally good for mass planting on sandy ground as they will make a thick barrier of healthy foliage.

	Quantity	Each	Per 10	Per 100
4 ft. high.....	500	\$0.20	\$1.50	\$12.00
5-6 ft. high.....	700	.50	4.50	30.00

3 ft. high.....	400	1.50	12.50	
4 ft. high.....	200	2.00	17.50	
3 yr. grafts, 5-6 ft. stems.....	200	3.00	27.50	

**Japanese.** *Cornus Kousa*.

Here is a chance to please yourself and surprise your friends. Plant these where White Dogwood grows and soon you will have flowers that are more graceful than White Dogwood and blooming a month later. In the Autumn there are big, soft, sweet, edible fruits nearly one inch in diameter. The reason we recommend it planted by the thousands is because it will harmonize with the native woodland.

3-6 in. high, 2 yr. seedlings....\$20.00 per 1000	40,000	.04	.30	2.50
1-1½ ft.....	500	.12	1.00	8.00

KŒLREUTERIA. See Varnish Tree.

LARCH, European. *Larix europæa* or *decidua*.

7-8 ft. high.....	50	1.50	10.00	
-------------------	----	------	-------	--

LARIX. See Larch.

LINDEN, American, Basswood. *Tilia americana*.

10-14 ft. high, 2 in. diam.....	30	2.00	15.00	
14-16 ft. high, 3 in. diam., 7-8 ft. spr.....	30	10.00	80.00	
18-20 ft. high, 4 in. diam., 7-8 ft. spr.....	20	30.00	200.00	

These are big trees at moderate prices. Well suited for street planting and for making groves. This species is native along the north shore of Long Island near the outcrops of clay. It is not as well adapted to other parts of Long Island as the following species.

Showy. *Tilia tomentosa* var. *Spectabilis*.

Rare variety we can recommend highly. It has very beautiful, shiny foliage, maintained in good condition throughout the season.

10-14 ft. high, 3 in. diam., 6-8 ft. spr.....	100	16.00	150.00	
18-20 ft. high, 5 in. diam., 9-10 ft. spr.....	30	40.00	300.00	
18-22 ft. high, 6 in. diam., 10-12 ft. spr.....	15	65.00		
20-24 ft. high, 7 in. diam., 10-12 ft. spr.....	15	75.00		

Silver. *Tilia tomentosa*, or *T. argentea*, or *T. alba*.

These are just as perfect as nursery trees can be. They have been transplanted wide apart so they have good roots. To emphasize their elliptical curve we have invented a form for trimming them.

Architects find them ideal for pleached alleys. City planners will find them worthy candidates for formal plazas. They have been trained with uniform heads on straight trunks of 7 ft. These trees have the quality that enables us to guarantee satisfactory growth or free replacement.

10 ft. high, 1½ in. diam., 3-4 ft. spr.....	10	2.50	22.50	
10 ft. high, 2 in. diam., 3-4 ft. spr.....	30	3.50	30.00

16-22 ft. high, 5 in. diam., 9-12 ft. spr.....	20	50.00		
16-24 ft. high, 6 in. diam., 10-12 ft. spr., 18 yrs.	10	70.00		
18-20 ft. high, 7 in. diam., 10-12 ft. spr.....	6	90.00		
18-22 ft., high, 8-10 in. diam., 11 ft. spr.....	10	100.00		

It takes only a few hours to dig a  
20-year-old tree—

Deliver to your place

Small-leaved Linden around entrance court. They were broad, low-branched specimens when we sold them

### LINDEN, Small-Leaved European. *Tilia cordata* or *T. ulmifolia*.

The European Linden is the favorite tree for street, park and formal planting. We have found the small leaved European Linden keeps excellent foliage and possesses the most beautiful outline as shown in the accompanying photograph of trees planted from our nursery at Hewlett Bay Park a few years ago.

	Quantity	Each	Per 10	Per 100
6 ft. high.....	1000	\$1.00	\$9.00	\$80.00
8 ft. high.....	600	1.75	15.00	135.00

1 ft. high.....	15	.50	4.00	
3-4 ft. high.....	10	1.50	12.00	

**Umbrella.** *Magnolia tripetala.*

This has run wild in springy places in the garden of Mr. Theodore A. Havemeyer, Brookville, L. I. Mr. Scudder, Northport, planted some of these by the road, where his trout stream enters the Bay. They are a delight to pass by, with their great clusters of tropical umbrella-like leaves and white flowers 1 ft. across. Their scarlet fruits are 2 in. in diameter. There are many places where you can plant these, and help feed the birds on their Southern migration.

**MALUS.** See Apple.

*Norway Maple.* The owner has planted 10 big trees on his own lawn and several more around houses he has built to sell. Sixteen of his neighbors have planted shade trees that saved them 10 to 20 years and they are all enthusiastic over their investment. These large trees have lifted the town of Plandome out of the commonplace—a lot of box-like houses on bare ground. They have helped to make it immediately attractive. If 16 out of 50 owners in this town have planted large trees, you may conclude that it is the right thing to do.

#### MAPLE, Norway. *Acer platanoides*.

Good Norway Maples have been a specialty through the past 50 years. They like the soil and climate. One experienced tree buyer said "The finest lot I have seen. How do you get them so straight?" We have trained them to a single leader and the trees which are not straight are cut out. The tops are round and symmetrical with the lower branches the right height for street trees as required by the shade tree commissions. The roots are just right. We dig them just right. The trees not only grow, but grow vigorously. These are grown to make Long Island beautiful, and real estate subdivisions can do nothing better than plant some of its streets with these fine trees and spend 25 cents a year mulching them with grass, and dig it in each year. It will do more than any other investment to lift the property out of the common place and help sell the lots.

Village improvement societies and others cannot do better than consider these trees. We will be glad to look over the neighborhood and suggest trees to fit the various soils. Norway Maples are a good all around tree, keeping good foliage, every year coming out early and holding late. They will thrive where the Elms do not, but soils where Elms do thrive you had best consider them for the sake of variety and greater beauty. On similar soils you can consider Swamp White Oak which will economically give the effect of the noblest American tree, White Oak. On higher soils you can consider the Red Oak. On gravelly subsoil the Black Oak. For stately avenues Lindens will be a source of pride for their beautiful ovate outlines and healthy foliage.

**Most Permanent PLANT OAKS Most Economical**

There is character in a grove of Oak. While you are beautifying, why not have the greatest beauty possible? It is a planting of this nature that will be a satisfaction to you, and most admired by your friends.

**OAK, Black.** *Quercus velutina*, or *Q. coccinea* var. *tinctoria*.

You have enjoyed the Long Island forests and landscapes of fields and scattered trees. Did you ever stop to analyze the elements of the landscape? Were not Oaks predominant? Nature allows to persist the trees which are most accurately fitted to the conditions. Only the trees which fit can be happy and beautiful. If you would plant the most beautiful landscape, you must use Oaks. Black Oak constitutes the greater part of Long Island forest.

**Pin. *Quercus palustris*.**

We call especial attention to our 2 to 3 inch trees. These are as good as can be grown. They have had a root-pruner run under them by eight horses. Four years ago they were transplanted in squares 6 feet apart. One critical buyer says, "I gave you first prize on your Pin Oaks, especially after I saw the roots." He bought 50 trees, and they all grew uniformly. We can show you a block of 1,000 Pin Oaks, planted six feet apart. Their uniform growth shows that Pin Oaks are not hard to transplant. This planting wide apart and root-pruning is an improvement on the old way of planting little trees one by three feet apart, letting them grow up crowded until they were two inches in diameter and hacking them out with short roots.

**Scarlet. *Quercus coccinea*.**

The handsomest of all the Oaks in its Autumn color. This and the Black Oak are the most rapid-growing Oaks of dry, sandy soils, making 2 to 3½ feet a year on established young trees. The larger sizes are difficult to transplant and slow to recover. Mix in a few Pines, and you have the ideal combination.

<b>White. <i>Quercus alba</i>.</b>					
Everyone admires the White Oak. They are slow to recover from transplanting, but we have run the tree digger under these with eight horses. This root-pruning and our careful digging make them the best White Oaks available. If some die, we will replace them. The Oaks seem to complete their first growth in June before they make new roots. That is the critical time when they need watering. Other trees make new roots in May.

**Obtuse-Leaved Japanese. *Retinispora obtusa*.**

1 ft. high.....	130	.60	5.00	
-----------------	-----	-----	------	--

A graphic sketch of how our evergreens are serving those who are getting the most enjoyment from their country or suburban homes. You can have absolute seclusion and highest beauty without waiting for trees to grow. We have done the waiting for you

KEY TO PLAN.—(1) Screen to adjoining properties. (2) Screen excluding a noisy, dusty street. (3) Background and inclosure for your flower-garden. (4) Screen to laundry-yard, garage, or other objects

**FIR, Concolor, or White.** *Abies concolor.*

A beautiful tree with silvery gray foliage less pronounced than the Colorado Blue Spruce. Broad, dignified, solid tree that is sure to keep in good condition hot, Summers or cold Winters. Grown very carefully, root-pruned and moved with big balls of earth. You are sure to realize that they are the aristocrats of your place. As they grow you will realize you have one of the rarest and also the best trees.

	Quantity	Each	Per 10	Per 100
6-12 in. high.....	2000	\$0.50	\$4.00	\$30.00
12-18 in. high.....	500	1.00	9.00	
1½ ft. high.....	500	1.50	12.50

7 ft. high, 3-4 ft. spr.....		22.00	200.00	
8 ft. high, 4-5 ft. spr.....	20	30.00	275.00	
9 ft. high, 5 ft. spr.....	7	40.00		

**Nikko.** *Abies homolepis*, or *A. brachyphylla*.

At the old Parsons Nursery we discovered this tree liked this climate, making a tall, handsome, dark tree. In fact, one of the best of the pointed top, dark, evergreens. Never gets Winter-killed and appears to like our hot Summers. It should thrive here because its native land is in Asia and it is accustomed to a colder Winter and hotter Summer than here, and the evergreens from that region, strange to say, are more hardy than those native to Long Island. This statement covers Japanese Yew, Japanese Black Pine, Korean Pine and Japanese Hemlock.

1 ft. high.....	600	.50	3.00	15.00
2 ft. high.....	700	1.75	15.00	
3 ft. high.....	200	3.00	27.50	
4 ft. high.....	100	4.00	37.50	
5 ft. high.....	50	7.00	65.00	
6 ft. high.....	75	10.00	90.00	
7 ft. high.....	50	12.00	110.00	
8 ft. high.....	50	16.00	150.00	
9 ft. high.....	25	25.00	240.00	
10 ft. high.....	25	45.00	375.00	

**Nordmann's.** *Abies Nordmanniana.*

Our Nordmann's Fir are particularly valuable because grown wide apart and we frequently transplant with big balls of earth. If they do not get this treatment, the roots are like a long carrot and they are not beautiful after moved to your grounds, or they fail. Some of the broad specimens give the effect of old dwarf Boxwood. If you wish a rich group of evergreens, be sure to consider them.

2 ft. high.....	40	3.00	25.00	200.00
3 ft. high.....	50	6.00	50.00	300.00
4 ft. high, 3-4 ft. spr.....	50	7.00	60.00	400.00
5 ft. high, 4-5 ft. spr.....	30	12.00	100.00	600.00
6 ft. high, 4-5 ft. spr.....	20	18.00	160.00	
7 ft. high, 5-7 ft. spr.....	35	20.00	180.00	
8 ft. high, 5-6 ft. spr.....	35	30.00	270.00	
10 ft. high, 6-8 ft. spr.....	75	50.00	450.00	
12 ft. high, 6-9 ft. spr.....	25	60.00	550.00	
14 ft. high, 7-9 ft. spr.....	15	70.00	650.00	

Larger trees up to 22 ft., 30 years old.

**Subalpine.** *Abies lasiocarpa.*

Closely resembles the Concolor Fir and like it, native to the rocky Mountains. From this region evergreens are especially hardy and beautiful here.

4 ft. high.....	10	6.00	50.00	
5 ft. high.....	15	10.00	90.00	
9 ft. high.....	10	30.00	250.00	

**Veitch's.** *Abies Veitchii.*

If you wish to plant a quantity of Balsam Fir use this. It smells just like the Balsam and looks better.

1 ft. high.....	100	1.00	7.50	
2 ft. high.....	150	2.00	18.00	
3 ft. high.....	200	3.00	27.50	
4 ft. high.....	20	4.00	37.50	

We have a few firs, which we have classed as irregular trees. They have the same good roots and big balls of earth, but are not the perfect turning-lathe specimens some insist upon. Perhaps the lower branch has been broken by the plough. They are not crowded left-over plants with tap roots like a carrot. These we offer at one-third off. Come and see them.

**HEMLOCK, American.** *Tsuga canadensis.*

Mix in the Hemlock for their graceful foliage among the Pines, Firs, Oaks and Dogwood. Hemlocks give their full beauty where sheltered from the wind by other trees. Come to the nursery and see how much better designs are made by grouping Laurel and Hemlock under the tall Cedars and Pines than if a large tree stands alone wind-swept and unhappy. We will help you design the group economically.

	Quantity	Each	Per 10	Per 100
1 ft. high.....	1000	\$0.50	\$4.00	\$30.00
1½ ft. high.....	1000	1.00	7.50	60.00
2 ft. high.....	1000	1.50	12.50	100.00
3 ft. high.....	200	2.50	20.00	
4 ft. high.....	200	4.00	35.00	300.00
5 ft. high.....		6.00	50.00	
6-7 ft. high.....		8.00	70.00	
8 ft. high.....		15.00	140.00	

**Japanese.** *Tsuga Sieboldi.*

Handsome hardy species. Recommended highly for hedges and general planting.

1½ ft. high.....	1000	.75	7.00	70.00
2 ft. high.....	75	1.25	10.00	90.00
4-6 ft. high.....	25	5.00	45.00	

**JUNIPERUS.** See Cedar or Juniper.

A large genus. Those in the trade include several low varieties growing from 1 to 5 feet high and, therefore, of high value in landscape groups where low plants are wanted that will stay low. They are happy in hot sunny situations.

The Red Cedar is also of this genus, but is listed under Cedar, page 14.

**Common.** *Juniperus communis.*

This is a species in abandoned pastures in New England, sometimes making mats 1 foot high and 10 feet wide, others forming big saucer-shaped plants 4 feet high.

You can use them in quantity on sandy banks, in foundation plantings on the sunny side of the house or to feather down a group of Pines and Cedars. Perhaps you will remember a beautiful combination of gray rock, Juniper, Pine and Birch which you would like to reproduce on your home grounds. We will help you make it successful, even to furnishing the rock.

8-12 in. high, 1-2 ft. spr.....	300	.50	4.00	35.00
---------------------------------	-----	-----	------	-------

**Chinese Procumbent.** *Juniperus Chinensis Procumbens.*

Trails along the ground about 1 foot high.

12 in. high, 6-10 in. spr.....	200	1.00	9.00	
--------------------------------	-----	------	------	--

**Dwarf Globe.** *Juniperus virginiana* var. *globosa.*

A little globe like Maxwell's Spruce, in a few years becoming 1½ foot high and 2 feet wide.

8-10 in. high.....	75	1.00	7.50	
--------------------	----	------	------	--

**Juniperus Stricta** var. *Glauca.*

Pretty little blue green plants becoming 5 feet high and 3 feet wide, and staying about that size.

1 ft. high.....	75	1.00	9.00	
1½ ft. high.....	75	2.00	17.50	

**Koster's.** *Juniperus virginiana* var. *Kosteri.*

Flat growth about 1½ foot high and 8 feet wide, keeping a healthy blue-green foliage.

6-12 in. wide.....	300	.40	3.00	25.00
--------------------	-----	-----	------	-------

**Pfitzer's.** *Juniperus Pfitzeriana.*

Rapidly becoming popular in plantations of dwarf evergreens. Its popularity is based on its merits. It is like a collection of ostrich plumes, broad, graceful and feathery in a few years making a plant 4 feet high and 5 feet broad. A pretty combination can be made with this and Kosteri and the Blue Red Cedar. They harmonize and in color are closely related, and only vary in their form of growth. We know you will be pleased with a group of them, and we know you will find it easy to arrange them.

1 ft. wide.....	75	.75	6.00	50.00
1½ ft. wide.....	200	1.25	10.00	

**Swedish.** *Juniperus communis* var. *suecica.*

Sharp little exclamation points similar to the Irish Yew, but hardy.

1-1½ ft. high.....	100	1.00	9.00	80.00
2 ft. high.....	75	1.50	10.00	
3 ft. high.....	10	2.00	15.00	

**PICEA.** See Spruce.**PSEUDOTSUGA.** See Spruce Douglas.

## Pines

Pines are a strong feature at the Hicks Nurseries. White Pines the strongest of all. The reason is not that they are easy to propagate, but that they are the right thing. They are right for the sandy soil of Long Island. They are right for the climate in the north-eastern states. We believed we could perform the greatest human service by growing Pines and Oaks, instead of Arborvitæ, Norway Spruce, Golden Retinospora and Carolina Poplars.

The quality is right. They will be delivered to you right. They are guaranteed to grow satisfactorily. There is little or no disappointment because of this preliminary training. They are economical for you to buy because you get more cubic yards of good all year foliage than in any other tree.

### PINE, Austrian. *Pinus Laricio* var. *austriaca*.

This species stands up against the salt spray or against Winter rains and snows, and always looks the same, bright and cheerful. Our plants are especially well grown, recently transplanted and root-pruned. This species has such long coarse roots that it is necessary to spend more in growing and digging with a larger ball of earth than some other evergreens.

	Quantity	Each	Per 10	Per 100
1 ft. high.....	500	.75	6.00	30.00
2 ft. high.....	600	1.75	15.00	100.00
3 ft. high.....	1000	5.00	40.00	300.00

10 ft. high.....	25	40.00	350.00	
12 ft. high.....	10	50.00	450.00	

### Jack. *Pinus Banksiana*, or *P. divaricata*.

There are two types of trees. One characterized by symmetrical outlines representing luxuriant growth under favorable conditions. The other one picturesque, showing irregular wind-blown, contorted outlines representing struggle with wind and poor soil. The Jack Pine typifies the latter. You can use it on the sand dunes and on dry hills. We can ship you carloads 6 to 12 feet high. They may be artistically arranged and practically the best thing. Other Pines suitable for salt spray and sand are the Japanese Black, Japanese Red, Pitch and Scotch.

1 ft. high.....	300	.40	3.50	25.00

**PINE, Japanese Black.** *Pinus Massoniana* syn. *Pinus thunbergii*.

Used in Japan on sandy coasts. It has proven economical and valuable here. We recommend you to try it. Keeps dark, rich green under the most trying circumstances. The form is irregular and picturesque.

	Quantity	Each	Per 10	Per 100
9-12 in. high, 4 yr. trans.....	600	\$0.30	\$2.50	\$20.00
1 ft. high.....	500	.40	3.50	25.00
2 ft. high.....	1000	.75	6.00	50.00
3 ft. high.....	300	1.25	10.00	75.00
4 ft. high, 2-3 ft. spr.....	100	3.00	25.00	225.00
6 ft. high, 4-5 ft. spr.....	12	6.00	50.00	

**Japanese Red.** *Pinus densiflora*.

This closely corresponds to the Scotch and Pitch Pine. Seems to delight in the sandy subsoil of Long Island. Makes a very rapid growth. You can use big masses of these pines to make a wall of green surrounding part of your property or subdividing building plots so they will look attractive for sale. We can make a reduced price on some of these, digging them without balls of earth. You will save 33 per cent. We will dig them carefully, and if you keep the roots moist until planted you should have satisfactory results. This statement includes Scotch, Pitch Red and Japanese Red Pines.

6-12 in. high, 2 yr. trans.....	\$40.00 per 1000	2000	.20	1.50	10.00
1 ft. high.....		500	.40	3.50	25.00

6 ft. high, 3-4 ft. spr.....		1000	6.00	50.00	400.00

**Japanese Umbrella.** *Sciadopitys verticillata*.

This belongs to such a distinct genius that it should not be classed with Pines, but used in the garden the same as Pyramidal Boxwood or Yew. In beauty and interest it is even superior to them. The leaves are 4 inches long arranged in whorls like the ribs of an umbrella.

1 ft. high.....	50	2.50	22.50
2 ft. high.....	50	4.00	30.00
3 ft. high.....	20	5.00	45.00
4 ft. high.....	10	8.00	75.00
5 ft. high.....	10	10.00	90.00

**Japanese Table.** *Pinus densiflora* var. *Tanyosho*.

2½ ft. high, 2½ ft. wide.....	10	6.00	50.00
-------------------------------	----	------	-------

**Korean.** *Pinus koraiensis*.

In form like the Austrian Pine. Has large edible seeds.

6-8 in. high.....	200	.25	2.00	18.00
2 ft. high.....	5	1.00		
3 ft. high.....	10	3.00	25.00	
4 ft. high.....	25	5.00	45.00	
6 ft. high, 3-4 ft. spr.....	5	15.00		

**Mugho or Mountain.** *Pinus montana* var. *Mughus*.

Makes cushion-like growth 3 to 6 feet high and twice as wide. Composes well with the Austrian, Scotch and other Pines.

1 ft. wide, 1 ft. high.....	600	1.25	10.50	90.00
1½ ft. wide, 1½ ft. high.....	500	2.50	20.00	180.00

Keep the roots moist. Puddle the roots. Dip them in a thick mud. Be sure it is not dirty water, but thick mud that coats the roots and keeps them from drying out

Planting a little Pine. Make the hole wide enough to spread out the roots. Cover with mellow earth and pack with the feet

**PINE, Pitch.** *Pinus rigida.*

The great Pine forests of New Jersey, Long Island and Cape Cod are mostly Pitch Pine, frequently swept by fire. The landscape is desolate and monotonous. Some people say they do not like the Pitch Pine. That is because they don't remember how appropriate it is where young trees have grown up with Birch, Cedar, Bayberry, Wild Roses and fire has not killed the branches. On the plains, sand dunes or sandy hills you can make beautiful groups with these trees.

		Quantity	Each	Per 10	Per 100
1 ft. high.....	\$75.00 per 1000	1100	\$0.40	\$3.50	\$12.00
2 ft. high.....		800	.75	6.00	30.00
3 ft. high.....		1000	1.50	12.00	110.00
4 ft. high.....		600	3.00	22.50	200.00
5 ft. high.....		200	5.00	40.00

4 ft. high.....		500	4.00	30.00	250.00
5 ft. high.....		50	6.00	50.00	

**Scotch.** *Pinus sylvestris.*

Probably the most rapid-growing Pine. While it will not equal the White Pine as an old tree it will be satisfactory for 20 years. Foliage is a cheerful, bright green. Strong and sturdy in wind, drought, snow or cold. If you are trying to make a sheltered home site mix them in your boundary wall. If you have a hundred home sites to prepare, let us design for you some walls of green. We can make them inviting to prospective purchasers. We firmly believe that beautifully designed evergreen boundaries will do more to attract home builders than concrete curbs and Carolina Poplars along the front. With these Scotch Pines, 3 to 4 feet high, you can in 1½ years get a real windbreak and screen. They will jump upwards 2 feet a year.

During April we can supply trees without balls in 2, 3 and 4 ft. sizes at 33 per cent. discount. No orders for less than 10 trees will be accepted at this rate. "Trees without balls" should be specified in the order.

In thinking of Hedges do not forget  
Pine

A Pine hedge is pruned this way.

Nip back at dotted lines.

Time of year to trim is May and June  
while the growth is young.

*White Pine. They make a wall of green around your lawn or garden, and give you all the pleasures of the country on a small area. You did not build your home in the country to see the busy street, or your neighbors' buildings and activities. With a wall of green you have country sites all around you, the sun and the sky over head. Walls of brick and stone surround many European gardens to give quiet, childproof rooms for all the family. The same conditions are developing in the suburbs of American cities. Walls of green are cheaper than walls of brick and stone, and more beautiful, more serviceable and more in accord with American ideals. We have been working for many years to grow walls of green and perfect the methods for safely and economically establishing them on your grounds.*

**PINE, White. *Pinus Strobus.***

You can plant no better evergreen. You would admire it at all stages of its growth. You can get it at all stages from little seedlings to picturesque trees 60 years old.

The most immediately serviceable trees are those 8 to 12 feet high because they are higher than the level of the eye. Now they are ready.

You can plan an irregular belt equivalent to two to four rows of trees. You can make a definite hedge and trim it. If the permanent height should be 8 or 15 feet high, you had best start to trim them as on page 19 so as to retain their lower branches. You will then be master of the situation when the trees will be glad to do all that they can for you.

Any time of the year you want these evergreens you can have them. We have developed methods equally successful all the year.

For the flower garden nothing can make a richer background than White Pine.

For the laundry yard and service court White Pine will make just the right kind of a wall, and also give the right setting to the house.

One of our customers at Hewlett Bay had planted a grove of White Pines on the north side of the house. He is very emphatic that it has saved coal and kept his house more comfortable in the severe Winters of 1917 and 1918 than when the house was first built. We have been loath to make this claim, thinking best to rely on good design of heating apparatus, tight windows and well-constructed walls. Even if they don't save coal and add to the comfort in the house, they add to comfort out of doors and add to beauty. He says that his friends are delighted to find how quiet and secluded the place is surrounded by a wall of green, even though it is next to busy streets.

	Quantity	Each	Per 10	Per 100

20 ft. high., 8-10 ft. spr.....	50	100.00	900.00	
22 ft. high, 12 ft. spr.....	15	120.00	1100.00	
24 ft. high, 8-10 ft. spr.....	10	140.00	1300.00	

This is the natural shape. It may be all right or it may grow too open or too tall or crowd and the lower branches die

You can keep it in the natural shape and increase the beauty and density by nipping back as shown on page 19

*Wall of Green. Let us list up for you, people in your neighborhood who have walls of evergreens around their country home. You can then ask them how highly they value their evergreen boundaries. Then let us tell you how easily you can have an evergreen boundary to your country place. The idea of letting the public see every bit of your land is rapidly changing because of the increased travel and because country houses are closer together*

**PINUS.** See Pine.

**RETINOSPORA.** See Cypress.

**SCIADOPITYS.** See Umbrella Pine.

	Quantity	Each	Per 10	Per 100
<b>SPRUCE, Koster's Colorado Blue. <i>Picea pungens</i> var. <i>Kosteri</i>.</b>				
1 ft. high.....	100	\$1.00	\$7.50

12 ft. high, 6-7 ft. spr.....	10	50.00		

**Colorado Blue. *Picea pungens* var. *glauca*.**

These older trees 4 feet high have been recently transplanted wide apart and have excellent root systems. The eye delights in contrast. Blue Spruce makes a strong contrast with darker green of other evergreens and with the green of the lawn. At the end of a vista between Pines, Fir and Hemlock, the Blue Spruce is appropriate. For a Pinetum or a museum of evergreens these specimens are just right.

1 ft. high.....	500	1.00	7.50	65.00

#### Douglas. *Pseudotsuga Douglasii.*

It is difficult to introduce a new name to the public, but take our word for it, this is a good tree. It has been tested for 30 years and no defects have appeared. It is native on the slopes of the Colorado Mountains and so it is accustomed to colder Winters and drier Summers than here.

Live Christmas trees of Douglas Spruce were sent out by us last year merely to get you acquainted with a good tree.

To start a good hedge or grove try some of them at 3 feet high. If you want a few to make a tall, narrow wall of green try those 9 feet high. Remember these and all the evergreens are guaranteed to grow satisfactorily, or replaced free. We wouldn't guarantee them if we didn't know they were good.

2-4 in. high, 2 yr. seedlings... \$35.00 per 1000	2500	.06	.50	4.00
4-8 in. high, 2 yr. trans..... 75.00 per 1000	26000	.10	.90	8.00
1 ft. high..... 200.00 per 1000	500	.50	4.00	25.00
2 ft. high..... 450.00 per 1000	2000	1.00	7.50	50.00

7 ft. high, 4 ft. spr.....	10	15.00		

TAXUS. See Yew.

THUYA. See Arborvitæ.

TSUGA. See Hemlock.

**YEW, Japanese. *Taxus cuspidata*.**

The Japanese Yew will do for Eastern United States what the English Yew does for England. You may have thought it was not possible to reproduce the Yew hedges of England. It is.

The original Japanese Yew trees brought by Hall, the missionary, from Japan, are perfectly happy here. From their seeds we have grown this stock. Probably the biggest stock available, but we are sure it will not be enough. It is just now becoming known. Try some and be among the first to get acquainted with its merits. You can use them among your groves of evergreens, at the house foundation and for low hedges in the garden where they will be better than Boxwood. Rich, dark green and hardy. It has an added charm of translucent red berries.

	Quantity	Each	Per 10	Per 100
6-8 in. high, 3 yrs. twice trans.....	900	\$0.35	\$3.00	\$25.00

5 ft. high.....	40	15.00	140.00	
6 ft. high.....	25	20.00	190.00	

**Japanese, flat. *Taxus cuspidata*.**

We have named this flat because it grows 4 to 6 feet high and 10 feet wide, while the above species (Jap Yew) will grow up like Spruce or Fir with a single leader 12 feet high and 6 feet broad. It is just the thing for foundation planting, for edging down groups of tall evergreens, for garden hedges, for a low evergreen cover where you wish to look over. Come and see our block of them. It is beautiful as dark-green velvet. It is the same as the above only it is grown from a side cutting and not from seed.

1 ft. wide, 1 ft. high.....	2000	2.00	15.00	130.00
1½ ft. high, 1½ ft. wide.....	4000	2.00	15.00	170.00
2 ft. high, 2 ft. wide.....	500	3.50	30.00	250.00

**Japanese Dwarf. *Taxus cuspidata* var *brevifolia*.**

Favorite with the landscape architects for a low foundation planting and gardens. It is low and will stay low. The original plants are only 2 feet high but they are 15 feet broad.

6-8 in. high, 4-8 in. spr.....	275	.60	5.00	45.00
6-12 in. high, 8 in. spr.....	3000	1.50	12.50	100.00
1-2 ft. high, 1½ ft. spr.....	50	5.00	40.00	
2-2½ ft. high, 1½ ft. spr.....	60	8.00	70.00	

**Spreading. *Taxus baccata* var *repandens*.**

This makes a little weeping mound of rich, dark green, just right to edge down foundation planting on north side of house. Particular ly likes to be in shady nooks. You could use it in the woods or under tall evergreens to round out the group. It will get 2 feet high and 4 feet broad.

8-12 in. high, 6-12 in. spr.....	1000	1.50	12.50	100.00
1-2 ft. high, 1½-2 ft. spr.....	2500	4.00	30.00	250.00

**Mulch.** A thick covering of manure, sea weed, eel grass or similar litter, keeps the ground cool and moist. Your trees will show their appreciation by a more vigorous and beautiful growth. If you cannot mulch, cultivate. Don't let the soil become hard and baked. Keep it loose at least 4 inches deep

## DECIDUOUS SHRUBS

<b>ACANTHOPANAX.</b> <i>Pentaphyllum.</i>	Quantity	Each	Per 10	Per 100

2 ft. high.....	25	3.00	25.00	

Screen of large growing shrubs. The insert shows how masses of shrub foliage can effectively screen the service end of the house. Ordinarily such shrubs can be planted about 4 feet apart. See Mock Orange (in illustration), Deutzia, Viburnum, Chinese Christmas Berry, Dogwood, Japanese green Maple and Golden Bell

**MOCK ORANGE, or Syringa.** *Philadelphus coronarius.*

Perfume has a strong hold upon the memory. Many people ask for Syringa, Sweet Shrub and Lilac who do not know other shrubs or flowers. Our plants, 4 feet high, are especially economical for extensive shrub planting or a flowering hedge. Plant them 6 feet apart, or in a hedge 2 feet apart.

2 ft. high.....	200	.20	1.50	12.50
3 ft. high.....	900	.35	3.00	20.00
4 ft. high.....	400	.50	4.00	35.00
5-6 ft. high.....	100	.75	6.00	

**MYRICA.** See Bayberry.

**ORANGE, Hardy.** *Citrus trifoliata.*

1-2 ft. high.....	200	.40	3.50	
-------------------	-----	-----	------	--

**PEARL BUSH EXOCHORDA.** *Grandiflora.*

Take some of these on our recommendation. They are rare because difficult to propagate and, therefore, you have not seen them so abundantly as Bridal Wreath or Lilac. It is very showy in bloom and maintains a healthy foliage throughout the rest of the season. Put twenty of them in the rear of a shrub border, or let them illuminate Pines and Cedars, like Dogwood.

### TO PLANT A PRIVET HEDGE

Sketch a line, cut down accurately to have one side straight and plumb. Make the trench 8-15 inches deep and wide. Mix manure in the soil if available

Hold the plants against the straight side. Plant deep enough to cover the lower branches. Pack the earth by the feet. Plant 8-12 inches apart

To make the hedge thick at the bottom cut back to 4-12 inches. Trim two or three times a year. Hoe and cultivate and fertilize like a row of potatoes.

**PRUNUS.** See Beach Plum.

**PYRUS.** See Quince Japanese.

**QUINCE, Chinese.** *Chaenomeles Sinensis.*

4 ft. high.....	100	.75	6.00	

#### TEMPORARY PLANTING OR HEALING IN

Cover the roots with mellow earth. Pack it with the heel. Therefore, healing in is the gardening name. If you can turn on the hose so much the better.

Doing this when you receive or unpack your trees you can keep them for several weeks, even when the leaves start out in the Spring. You can keep them this way all Winter

#### COVERING FOR A FEW HOURS

Protect the roots with straw, burlap, blanket or anything to keep off the sun and wind. Throw on water. Because a root looks dry and dusty it is not dead. Scratch the bark and see if it is not damp inside

On the left,  
*Viburnum*  
*Cassinoides*.  
Bright berries in  
late Summer. A robust shrub.  
On the right, *Styrax*. A rare  
little tree. The branches  
spread gracefully and are  
hung with clusters of creamy  
yellow flowers, like orange blossoms in early June.  
The foliage is dark green. Grows to be about 12  
feet high, and is splendid for use in back of lower-  
growing shrubs

SNOWBERRY. <i>Symphoricarpos racemosus</i> .	Quantity	Each	Per 10	Per 100

Are you a friend of the birds? They require food and shelter. We grow many berry-bearing trees and shrubs which provide food, and our evergreens will give just the winter shelter and nesting-sites they need. See our offerings on Viburnum, Cornus, Sumach, Barberry, Photinia, Elder, Black Alder, Holly, Bayberry, Spice Bush, Snowberry, Elæagnus, Magnolia, Bush Honeysuckle, Virginia Creeper, Hall's Honeysuckle, Juniper. We can make up a collection at \$10 per 100, of different berry-bearing plants in small sizes. Plant in tangled thickets and in large quantities.

# RHODODENDRONS

*Come and see them in bloom May 20th to June 5th and take them home in full bloom*

These Rhododendrons have been growing here three to six years. Therefore they have big balls of roots, as illustrated bottom page 40, and will thrive for you.

They have been grown in the open, which has produced more flower buds, so you will get a big show of flowers this year.

Color enthusiasts can feel assured of harmonious sweeps of color by following these color descriptions.

See page 40 for soil requirements and care.

### RHODODENDRONS AT THE FOUNDATION OF THE HOUSE

There is sure to be some place around the house where these plants will succeed. It may be a shaded corner where you have had difficulty in getting things to grow. Just the place for a bright clump of Rhododendrons. They will succeed on the sunny side just the same. It is merely a matter of decaying leaves and water. See sketch. It is best to plant 3 or 4 rows, spacing 2 to 13 feet apart. To cover the ground between the plants, use Pachysandra, which makes an evergreen cover 6 inches high.

### OTHER USES

What to plant in the woods is a frequent question. Rhododendrons are often the best answer. The decaying leaves are there. The shade and wind protection are just right. Rhododendrons blend harmoniously with the Dogwood, Arrowwood, Oak and Hickory.

In the Winter Rhododendrons enliven the scene which is otherwise monotonous. As the plants grow and commence to touch you can have the pleasure of extending the group, carrying the eye further back into the deeper shadows. Since the Chestnut bark disease has thinned out the forests the woods have lost some of their charm. This loss will soon be forgotten, if you guide the development of the Oaks and Hickories and transform them from poles to broad, park-like trees. In the sunny areas you can plant Rhododendrons. Pines, Hemlock and many shrubs. To add to Winter greenery you can have a carpet of Myrtle and Pachysandra. Climbing up the trees you can have Euonymus Radicans or Evergreen Bittersweet, English Ivy and Japanese Honeysuckle.

### HOW TO PLANT AND CARE FOR RHODODENDRONS

All that Rhododendrons ask for is decaying leaves. You may remember a circular we sent out on "Winter Planting," mentioning Winter work your men could do,—rake leaves to add to the fertility of your soil.

Dig in leaves until your soil consists of about half leaves. When you plant, pack the earth firmly around the balls and give them a good soaking with water.

Watering perhaps three or four times during the Summer will pay. The Rhododendrons will have a richer, darker color, and you will insure against losing any plants. It may not be practical to water out in the woods, but you should at least dig down and see if the ball of earth is getting dry during the first Summer.

Evergreen bittersweet or *Euonymus radicans*, var. *vegetus*. This has round, thick, leathery leaves about 1 inch in diameter. It will make a branchy little bush 2 feet high, or it will climb like a vine. Most effective for use in front of taller evergreens, or for planting at the base of the porch where a low-growing plant is required. Even when small, it bears heavy crops of showy red berries like those of the Bittersweet

*Satisfy your hunger for Roses at Hicks Nurseries. Come all Summer and take the plants home in bloom. This gives you opportunity to study the delicate shadings and get just what you want*

## ROSES

### Hybrid Perpetual

75c. each, \$6.00 for 10, \$50.00 per 100

- Anna de Diesbach.** HP. Carmine-pink; extra large.  
**Baroness Rothschild.** Delicate rose-white.  
**Baby Rambler.** Polyantha. Crimson; constant bloomer.  
**Captain Hayward.** HP. Crimson-carmine; very sweet.  
**Clio.** HP. Soft pink with rosy center.  
**Francois Levet.** HP. Rosy Crimson; free-blooming.  
**Frau Karl Druschki.** HP. Pure white; very large.  
**Gen. Jacqueminot.** HP. Intense crimson; one of the best.  
**Gruss an Teplitz.** HT. Rich, velvety crimson.  
**Hermosa.** Bourbon-China. Bright pink; very fragrant.  
**J. B. Clark.** HP. Deep scarlet; very strong.  
**Killarney.** HT. Pink; very vigorous and free.  
**La France.** HT. Peachy pink; very strong.  
**Magna Charta.** HP. Rosy pink; extra large.  
**Mme. Caroline Testout.** HT. Rich pink; one of the finest.  
**Mme. Gabriel Luizet.** Silvery pink.  
**Mme. Plantier.** HP. Fine white; extremely hardy.  
**Mrs. R. G. Sherman Crawford.**  
**Mrs. John Laing.** HP. Soft pink; very large.  
**Oscar Cordel.** Bright carmine.  
**Paul Neyron.** HP. Clear pink; the largest of all.  
**Persian Yellow.** Austrian Brier. Deep golden yellow.  
**Prince Camille de Rohan.** Dark crimson. Fine.  
**Pride of Waltham.** Light salmon pink, shaded rose.  
**Ulrich Brunner.** HP. Cherry red, profuse; vigorous.

## Climbing Roses

50c. each, \$4.00 for 10, \$30.00 per 100

- Alberic Barbier. Yellow in bud, fading to creamy white.  
 American Pillar. Single pink.  
 Aviateur Bleriot. Cream. 75c. each, \$6.00 for 10, \$50.00 per 100.  
 Crimson Rambler. Vivid crimson; large clusters.  
 Dr. Van Fleet. Silvery pink.  
 Dorothy Perkins. Brilliant pink; in clusters.  
 Excelsa. Brilliant crimson, with scarlet edges.  
 Gardenia. Creamy yellow; fragrant.  
 Hiawatha. Single crimson.  
 Lady Gay. Cherry-pink; quilled petals.  
 Mrs. M. A. Walsh. Pure white.  
 Prairie. Bright pink; single.  
 Ruby Queen. Deep red, white center.  
 Silver Moon. Single white, yellow stamen.  
 Tausendschon. Pink.  
 Universal Favorite. Beautiful rose-pink.  
 Wichuraiana. Pure white; single; fragrant.

## Hybrid Tea and Tea Roses

Potted plants \$1.00 each, \$7.50 per 10; \$60.00 per 100. Come and take them in bloom all summer. Not Potted, 75c. each, \$6.00 per 10, \$50.00 per 100.

- Admiral Ward. Flowers of velvety crimson shaded with purple. A new introduction of vigorous growth. Very handsome.  
 Augustine Guinoisseau. This variety is especially valuable for cut flowers. The white flowers are very fragrant and showy.  
 Betty. Golden yellow.  
 Chateau de Clos Vougeot. A deep velvety crimson. This variety makes a strong growth and flowers freely.  
 Constance. (Hybrid Austrian Briar). A golden yellow rose of delightful fragrance. The buds are long and streaked with crimson. The foliage is of a shining green. A recent introduction; this is one of the finest yellows.  
 Duchess of Wellington. A very intense saffron yellow rose. Healthy, strong growing habit. Glossy green foliage.  
 Etoile de France. Bright red, fine.  
 Frau Karl Smid.  
 General MacArthur. A fine garden rose, deep rosy-crimson blossoms, very fragrant and free flowering.  
 Gen. Superior Arnold Janssen. A new rose of rich carmine color. A vigorous plant and very floriferous.  
 Geo. C. Wand. A lovely rose of orange vermillion. Few roses have a more beautiful coloring. A thrifty grower.  
 Gustav Grunerwald. A carmine pink rose with a yellow center and distinctly long-pointed buds. This is a fine healthy form.  
 Indiana. Deep crimson.  
 Jonkheer J. L. Mock. The finest of all pink Hybrid Teas. Described as Imperial pink. this is acknowledged as one of the best roses of recent introduction  
 Joseph Hill. Large flowers of salmon pink, tinged with copper, very fragrant. A stocky plant flowering profusely.  
 Kaiserin Auguste Victoria. Cream-white.  
 Killarney White. Flesh pink, shaded white.  
 Konigin Carola. Large flowers of pale satiny rose. A thrifty variety flowering freely.  
 Lady Alice Stanley. The flowers vary from light pink to a deep rose and are borne on long stiff stems. A very distinct rose.  
 Lady Ashtown. Deep pink blooms, large and full, very often on pendulous stems. Good variety.  
 Lady Greenall. Coppery orange.  
 Lady Hillingdon. Orange yellow.  
 Laurent Carle. A deep lustrous red. This a remarkably showy rose with its large flowers and brilliant color.  
 Lieutenant Chauré. Velvety crimson flowers. An especially fine garden variety. Vigorous grower.  
 Lyon Rose. One of the showiest and most decorative varieties. Petal edges shrimp pink, center coral-red tinged with chrome-yellow at the base. The flowers are large and full.

- Mme. Abel Chatenay.** A beautiful flower of carmine rose, tinted salmon; the petals have a silvery tinge. A very robust variety worthy of a place in every garden.
- Mme. Colette Martinet.** Old gold, shaded orange yellow. The long golden buds are unusually distinctive and are a marked contrast to the bronzed-green foliage.
- Mme. Edouard Herriot.** Known as the "Daily Mail Rose"; this rose is a prize winner. Coral red shaded with yellow and rosy scarlet; it presents one of the most charming of garden flowers.
- Mme. Julez Bouche.** A fine healthy variety. Salmon white shaded clear pink. A very meritorious variety for the garden.
- Mme. Leon Paine.** The combination of colors in this rose is remarkably beautiful. Silvery white with an orange yellow center and the reverse side of petals reddish pink. A variety of strong growth.
- Mme. Segond Weber.** The large rosy salmon blossoms of this rose are markedly distinctive. Growth is strong and erect.
- Mad. Jules Grolez.** Light satiny rose. Free bloomer.
- Maman Cochet.** Carmine rose.
- Marie Van Houtte.** (Tea.) A rose of the Tea group, with white flowers tinted yellow shading to rosy tipped petals, pleasantly fragrant.
- Marquise de Ganay.**
- Miss Cynthia Forde.** A fine rose of a deep showy rose pink.
- Mrs. Aaron Ward.** This rose is uniquely described as "Indian yellow, suffused with salmon." A wonderful variety, blooming freely and of vigorous habit.
- Mrs. F. W. Vanderbilt.** Flowers of a deep orange red shade. A very ornamental garden and bedding rose.
- Mrs. Harold Brocklebank.** A creamy-white rose with the base of the petals golden yellow. Very handsome form.
- Mrs. Theodore Roosevelt.** Another creamy-white rose but with a rose center. The buds are distinctly long-pointed. Good habit.
- Ophelia.** Although originated in 1912, this is still a most favored rose. A rosy pink shaded with salmon. Finely shaped blooms and vigorous habit.
- Pharisaer.** A free-flowering rose of lustrous rose color with a reddish pink center.
- Prince of Bulgaria.** A very charming rose with flowers of silvery pink tinted with salmon. Blooms very large and well formed.
- Radiance.** A rose of many colors, brilliant carmine, shaded salmon and coppery red. Healthy habit.
- Souv. de Gustav Prat.** A pure sulphur white rose, sometimes without the yellow shading, very floriferous and perpetual blooming.
- Souv. de Pierre Notting.** Tea. A very handsome rose, apricot yellow tinted with orange. A fine healthy plant of strong growth.
- Souv. de Pres. Carnot.** Light rose and white.
- Viscountess Folkestone.** Light pink with a darket center. Large and fragrant flowers. An early bloomer and very free flowering.
- W. R. Smith.** Tea. Flowers of creamy-white flushed with bright rosy pink. Large and finely formed flowers.
- Willowmere.** (Rosa lutea hybrid). An Austrian rose hybrid. One of the most admired of new roses. Color a deep pink shaded yellow in the center and changing to carmine pink at the edges of petals. A very vigorous grower.

### Wild Roses

25c. each, \$2.00 for 10, \$18.00 per 100

- Rosa blanda.** *Meadow Rose.* Pink.
- Rosa Carolina.** *Swamp Rose.* Pink; hips red.
- Rosa multiflora.** *Blackberry Rose.* White flowers.
- Rosa nitida.** *Northeastern Rose.* Pink; foliage shiny.
- Sweet Briar.** Single rose-pink flowers.

### Dwarf Polyantha Hybrid Roses

75c. each, \$6.00 for 10, \$50.00 per 100

These varieties are of dwarf habit with smaller but very exquisite flowers. They make splendid edging plants and are particularly adapted to positions where low plants are needed. They require but little pruning.

- Cecil Brunner.** A light pink, double rose, with a yellowish center. Very fragrant. A most charming buttonhole flower.
- Clothilde Soupert.** Flowers pure white, tinted silvery rose near the center and a pearly white toward the edge of outer petals. A profuse bloomer.
- Jessie.** Bright orange-red blossoms. This is one of the choicest roses of this class. A sturdy grower and very floriferous.
- Maman Levasseur.** (Baby Dorothy Perkins). Large clusters of shell pink blossoms. A very persistent bloomer.

# HARDY GARDEN FLOWERS

We have several acres of vigorous, large plants. These will take less number per plants for a given area than the usual commercial size, but they may not be quite so easy to handle. We plant carefully and guarantee satisfactory delivery. If any plants are in an unsatisfactory condition when delivered, please notify us immediately and we will be glad to replace.

They have been carefully grown and accurately assorted as to color. If any plants prove unsatisfactory as to color, we would be glad to replace them.

	Each	Per 10	Per 100
ACHILLEA ptarmica fl. pl. "The Pearl." Double, white flowers.....	\$0.15	\$1.25	\$10.00

ARMERIA plantaginea. <i>Thrift</i> . Sea Pink, Rose Pink... ..	.20	1.75	15.00

Just the thing for a seaside garden. A tuft of thick grass-like foliage with little round pink flowers. Its main value, however, is the bright green foliage. It delights in the seashore because it is native to the shores of England.

ARTEMISIA latifolia.....	.25	2.00	18.00
ASCLEPIAS tuberosa. <i>Butterfly Weed</i> . Orange.....	.20	1.75	15.00

Shallow cultivating only scrapes the soil loose on the surface and leaves a hard layer of soil underneath—permitting valuable moisture to escape through capillarity

Four-inch deep cultivating. Frequent cultivating. No hard and packed layer of soil underneath but loose mellow soil that retains moisture for the plants to drink

You would not object to having a garden like this. You have the space and we have the plants and a man ready to talk it over

Have you an area in your garden you are undecided how to treat? Fill it with Iris

*Phlox.* White flowers in abundance has become almost a doctrine with the owner of this garden. That is why it is attractive. If you visit there in Summer you find large masses of white Phlox which keep the garden brilliant six or eight of the most trying weeks of the season.

Phlox is another specialty. We are selecting the varieties with great care, reducing the list to a few of the best colors and best growers. We have a large area kept under the highest cultivation. Big, strong plants that will throw up several flower heads.

Plants in large pots can be furnished throughout the Summer.  
The best thing for filling vacancies as they occur in the garden.

Plant Grape vines this year, and eat Grapes next. The sketch shows how to prune. A separate branch is trained for each wire. The first wire can be three or more feet above the ground and additional wires 18 inches above. Six to eight buds are allowed to remain on each arm, which produce fruiting branches. These arms are to be removed entirely the following Winter and replaced by new fruiting canes which have grown from the main branch. Tie these canes to the wire, and cut back to six or eight buds

Newly planted Apple or Pear Trees should be pruned back to three or four branches, 8 inches long, disposed equally about the body of the tree, with several inches between. Each branch can be allowed to carry three subdivisions. The Spring following cut back the previous year's growth to 1 foot, allowing each subdivision to carry two branches instead of three. Keep the tops open so that the sunlight reaches all parts
